

CSIRO OVERVIEW

At the Commonwealth Scientific and Industrial Research Organisation (CSIRO), we shape the future. We do this by using science to solve real issues. Our research makes a difference to people, industry and the planet.

We ask, we seek, we solve. As Australia's national science agency we've been pushing the edge of what's possible for over 85 years — and we're not stopping now.

At CSIRO we shape the future. We do this by using science to solve real issues. Our research makes a difference to industry, people and the planet.

We're Australia's leading multidisciplinary research organisation, with more than 5000 talented people working out of 55 centres in Australia and internationally. We play a vital role in enhancing collaboration within the Australian national innovation system, and as a trusted advisor to government, industry and the community.

We're an Australian Government corporate entity, with a Board and Chief Executive. We're constituted by and operate under the provisions of the [Science and Industry Research Act 1949](#), which sets out our functions and powers, as well as those of our Minister, Board and Chief Executive. The governance, performance and accountability of our operations, including the use and management of public resources are set out in the [Public Governance, Performance and Accountability Act 2013](#) and related rules.
